Onyx

Fleet management for mixed rental and construction fleets

Featuring the New CAN tracker for industrial mixed fleets.

Know where a machine is located, when it is being operated, and when it is due for maintenance.

NEW

Onyx: monitor your fleet in real time

Track & trace

- **GPS tracking:** Know where your vehicles are so you can stop wasting time searching for them.
- **Location history:** Know where they have been throughout rental or construction periods for full monitoring of your fleet.

Security & safety

- **Access management:** Manage access to your equipment to ensure safer operation.
- **Geofencing and theft detection:** Get notified about unauthorised movement and tracker tampering so you can respond quickly when equipment is stolen.
- **Back-up solution:** Place a secondary, independently-powered tracker to receive GPS locations in case of theft.

Service & maintenance

- **Forecasting and notification:** Plan maintenance ahead of time by keeping an eye on operating hours and calendar deadlines.
- **CAN insights:** Avoid unnecessary trips for technicians and save your business valuable time and resources by assessing problems remotely.

Operational efficiency

- **Machine use data:** Optimise your fleet composition by knowing how efficiently your equipment is used.
- **Usage insights:** Invoice based on real data and negotiate with your customers more effectively on rental fees and overtime.

Onyx is a fleet management solution that tracks industrial equipment of **all makes and models** in rental and construction.

The Onyx family

The Onyx family of trackers are designed specifically for mixed rental and construction fleets.

They're the robust hardware components of GemOne's fleet management solution.

They empower you to track vehicles, boost efficiency, manage access, and avoid unexpected downtime.

Onyx V4: The New CAN tracker for mixed industrial fleets

Monitor your mixed rental or construction fleet with this 4G-enabled, high-voltage, CAN tracker.

Battery-powered tracker:

**A tracker with internal
battery life of up to
10 years**

Place this tracker on high value or non-powered assets such as containers and trailers to track their locations and enhance theft detection.

How it works:

01 Easily install the Onyx tracker onto your equipment

Any make or model
Connects all machines in your fleet to GemOne Cloud.

Global coverage
Leverages 4G LTE wireless communication.

Robust hardware
IP67-certified for dust and water resistance to meet industrial demands.

CAN insights
Reads DUAL CAN bus data such as operating hours, fuel information, error codes, and much more.

Internal relay system
Enables remote ignition blocking and power switching.

High voltage
Supports up to 97V DC (with over voltage protection up to 120V).

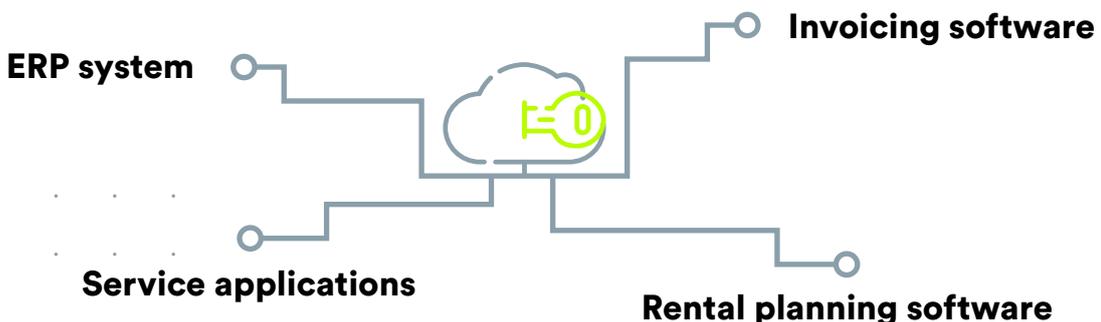

02 See actionable insights on a single online platform

GemOne Cloud:

The single source of truth for fleet data

One consolidated online platform with near real-time data and smart, actionable insights about your fleet.

03 Connect seamlessly with your existing business systems

About GemOne

GemOne[®]

A company of **TVH**

- Global provider of smart telematics solutions, with more than **100,000 assets connected** globally
- Dedicated **customer experience team** for quick and coordinated telematics roll-outs
- Professional services for **worry-free integration** with your business IT systems
