A company of **TVH** 

Sapphire

Safety management for material handling

Sapphire is a safety management solution for the material handling industry which has unleashed the potential of tens of thousands of industrial machines across the world.

Whether you're an equipment dealer or the owner of machines, Sapphire increases the safety and efficiency of your fleet today and future-proofs your business for tomorrow.

Never fail on safety requirements again

Automated Checklist

Our on-screen safety checklists **make pre-start checks mandatory, with operator lockout** if there's a critical issue. It ensures operators have inspected the machine and determined that it is safe to operate.

It documents the completed checklist and the amount of time it took to complete. It tracks user behaviour and safety issues with actionable insights on a cloud platform.

Operator	Not Configured	Incomplete	Pass	Fail	Critical Fail	Pre-start Critical Failure	Total	Completion Rate
David Brown	0% (0)	2% (1)	87% (48)	5% (3)	2% (1)	4% (2)	55	98%
Robert J. Henderson	0% (0)	41% (7)	59% (10)	0%	0%	0%	17	55%
Adam McQuibban	0% (0)	0% (0)	100% (3)	0%	0%	0%	3	100%
Al Cook	0% (0)	100% (1)	0% (0)	0%	0%	0%	1	0%
Neil Bennett	0% (0)	0% (0)	97% (83)	3% (2)	0%	0%	62	100%
Andy Brown	0% (0)	0% (0)	100% (2)	0%	0%	0%	2	100%
Ben Conner	0% (0)	0% (0)	100% (1)	0%	0%	0%	1	100%
Ben Henderson	0% (0)	0% (0)	100% (23)	0%	0%	0%	23	100%
Neil McQuibban	0% (0)	0% (0)	100% (1)	0%	0%	0%	1	100%
Neil Henderson	0% (0)	2% (1)	97% (8)	2% (1)	0%	0%	61	98%

Control how often the checklist is presented.

Create multiple checklists to suit every type of machine in your fleet. **Customize questions** to meet your own requirements and randomize the order of questions to avoid mindless signing-off.

-  **No clipboards.**
-  **No illegible writing.**
-  **No paper.**

Just a safe fleet, every day.

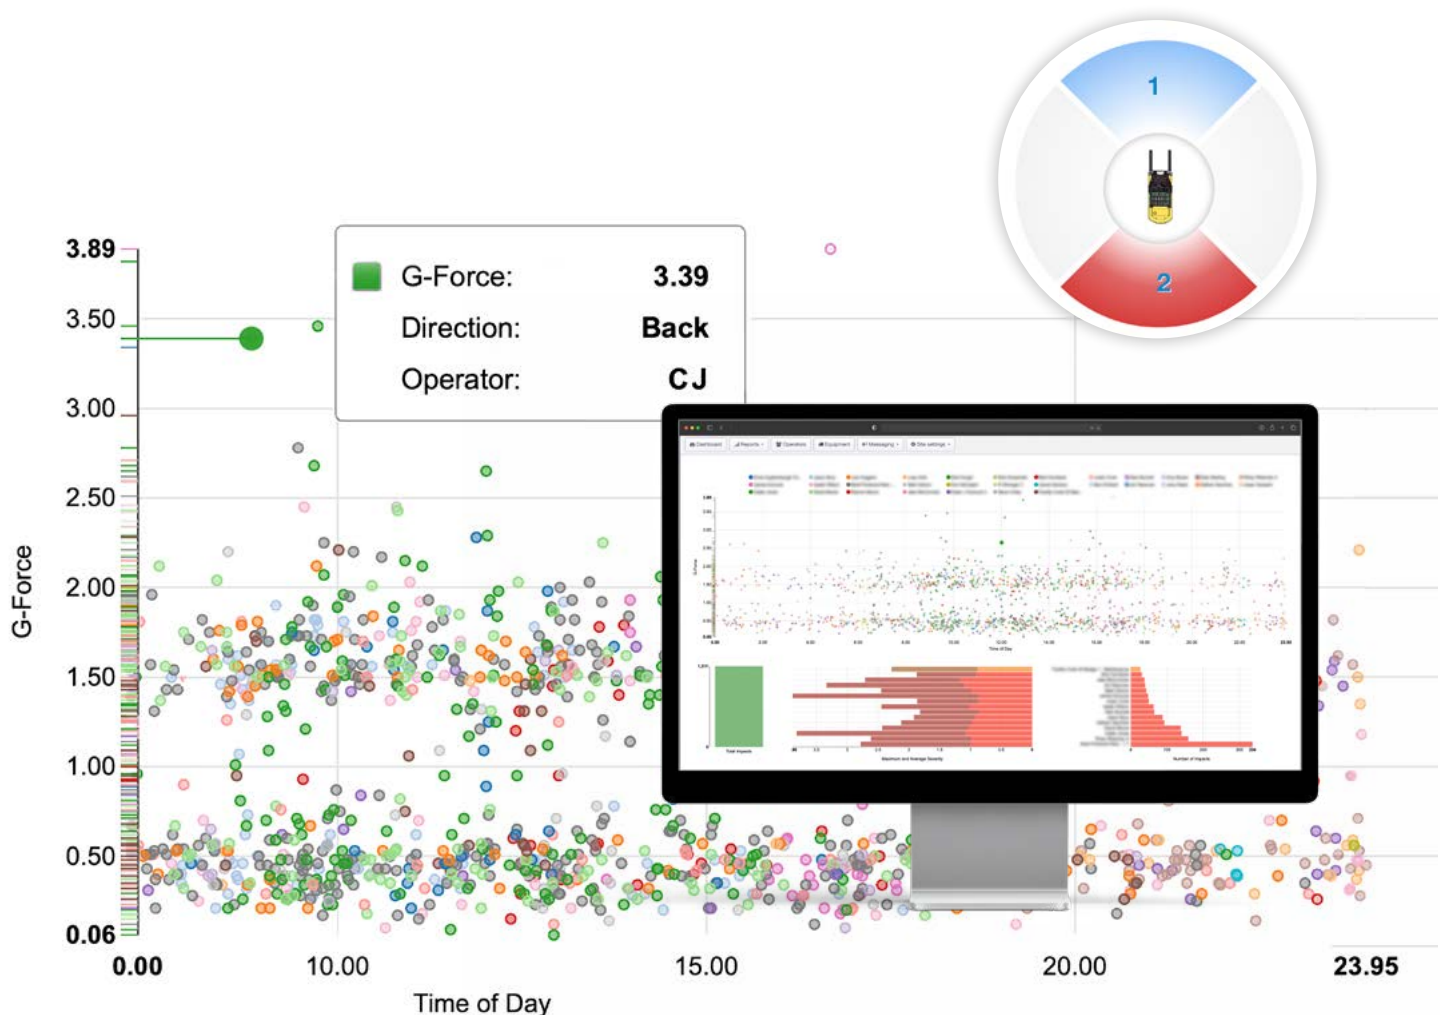

End lack of oversight on reported impacts

Impact Reporting

Unreported impacts are costly to your business, both in terms of product and equipment damage and machine downtime.

Receive instant notifications of impacts so you can **identify which operators and areas are most prone to incidents.**

Set up lockout thresholds to notify the operator after an impact and to promote a safer workspace. You decide what these impact level thresholds are based on your specific needs and work environment. **Add additional strobes and buzzer alarms** to encourage safer driving behavior and reduce incidents inside and outside your warehouse..

Put an end to unapproved use of machines

Operator Access Control via PIN/RFID

Give access to your machines to approved operators via a **pin code**, **RFID card**, or **RFID fob**. Choose who you want to operate each machine, based on your own criteria of certifications and training.

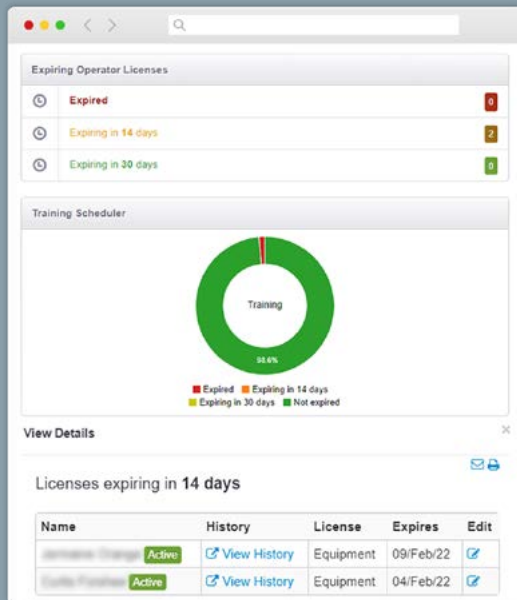

Those using standard non-RFID badges who don't want to manage a second ID card may also be able to integrate their existing cards into our system or attach our optional RFID sticker to their current badges for seamless use.

Cut out the uncertified use of machines for good

Certification Management

With Operator Certification and Training expiration tracking, you can ensure that operators using your machines **always comply with the appropriate training** and certification requirements.

An Operator whose certificate expires will be instantly locked out of all equipment to ensure safety and compliance. You'll never lose track of certification requirements and you'll ensure every operator has the up-to-date certifications to operate their equipment.

Stop guessing which machines work the most

Hour Meters Reporting

See exactly how long your machines are used.

Are some machines underused while other machines are overutilized?

Accumulated Key Hour Report

Asset No.	Date	Total
H4-09	01/26/2022	5325
H4-10	01/26/2022	7860
H4-11	01/26/2022	6614
H4-12	01/26/2022	6816
H4-13	01/26/2022	7860
H4-14	01/26/2022	113
Total		34500

Have all the data you need at your fingertips to make smarter business decisions about **optimal fleet composition.**

Hours reporting helps you improve productivity and invest in your fleet more effectively.

Dealers can also be given access to this data so they get actionable insights on hour meters for setting service intervals proactively.

 **Less guessing when a forklift needs work.**

 **Fewer maintenance issues.**

 **Reduced machine downtime.**

End confusion about how efficiently operators use machines

Session Reporting

Monitor the activity of both **individual operators** and **each of your machines** on a daily basis to gain insights on efficiencies.

Use reports in staff reviews and to set KPIs which reward safe, productive driving behaviour.

Gain insights on key time, seat time, and hours of movement. Identify and remove roadblocks to efficiency.

Get rid of dangerous blind spots in operator visibility

Cameras

- Reduce risk of equipment damage.
- Increase productivity.
- Reduce operator fatigue and stress.
- Shorten training time for new drivers.
- Increase work area safety.

Operators **see clearly** with the HR cameras (720p) where their vision is normally limited: in high level racking, double-deep racking, low level lighting, and blind spots.

The Sapphire displays up to 4 camera views. Cameras are recording if the forklift is turned on.

The cameras are **easily installed** on a strong, secure, magnetic base with no welding or drilling required.

Cameras can be repositioned as needed and are suitable for use **indoors and outside**.

Fork View

Provides the operator with a clear view of the fork tips. Installed onto the carriage and ideal for high-lift height applications or double-deep racking.

Mast View

Provides the operator with a clear view of fork depth and views over the load on their blind side.

Rear View

Provides the operator with an overview of the work area, with excellent picture quality in low light (especially helpful when backing into tight quarters or blind spots.)

The cameras **automatically record video** to capture data that assists incident investigation.

Local footage playback gives the ability to view footage directly from the Sapphire display

Get up to **11 days of video** and then easily swap out your SD card for more.

Never overload your forklift again

Forklift Load Sensors

Designed to fit any forklift model, our digital forklift load sensor prevents overloading, ensuring your operators work safely and your equipment is protected

- Avoid dangerous situations relating to the overloading of forklifts.
- Minimize the maintenance costs of machine wear and tear.
- Protect your machines and increase equipment longevity.

An **overweight alarm** prevents the forklift from lifting weights in excess of the equipment's capacity.

You can **enable automatic lockout** of your forklift in the case of weight overload for a safer working environment.

Calibration is simple and accurate, with 1kg or 1lb increments, depending on your preferences, to within 2% of the forklift rated capacity.

Note:

When the scale is installed, the analog input will be reserved for the scale and cannot be used for other inputs. Only one feature can be connected to the input at a given time. This means when the scale is connected to the analog input, you will be unable to use your analog input for other functions (such as timers or operator presence switches).

Key features

Cloud platform

See all the data from your warehouse in an online cloud platform that offers **valuable business insights**.

Actionable insights

Download any report at any time, or schedule them to suit your needs. Know what is happening with your fleet at all times so you can respond in a heartbeat. Access your **data via any web-enabled device, anywhere, anytime**.

Fully customizable

Choose between overhead guard mounts or clamp mounts. Add **optional features** such as battery monitoring and proximity warning or **additional accessories** such as strobes and alarms for impact lockouts or safety checklist failures.

Built tough

Our hardware is **IP67 certified for industrial use**. EE Rated solutions are available for custom orders. We back every system with an industry-leading **2 year warranty** as standard, with a possibility of extending this warranty depending on your needs.
