

GemOne®

Proactive partner for your fleet

In Onyx and Sapphire, we've developed two complete systems that boost your industrial fleet efficiency.

Our teams work closely with you to establish the best combination of machine-specific accessories for your fleet and the most suitable software modules for your business.

We deliver a system that meets your company's needs today and responds to the challenges your business will face tomorrow.

Discover how GemOne telematics can make your industrial fleet safer and more efficient.

GemOne®

Unleash Your Fleet

Smart telematics to boost your industrial fleet efficiency

GemOne provides modern telematics systems that empower you to track your vehicles, boost efficiency, operate more safely, and avoid unexpected downtime.

Whether you're in material handling or mixed fleet management.

Whether you're a rental company, a dealership, or an end user.

GemOne helps you to unleash the power of your fleet

We are GemOne

One Platform

We can connect any make or model of machine on one single platform, maximising what you can do with an individual vehicle or a fleet of thousands. And through that one single platform we offer you valuable business data, great user experience, continuous support, and worry free scalability.

One Team

We've got 50 years of experience with industrial equipment, 20 years of expertise in digitization, and 10 years of specialization in telematics. We combine telecommunications with computer science to create one unique system.

One Vision

We know machines and we know business. As we've developed this know-how, we've established 4 pillars at the foundation of everything we do:

Track & trace

Know where your vehicles are at any moment.

Operational efficiency

Measure the use and efficiency of your fleet.

Security & safety

See who is using your machines and whether they're using them safely.

Service & maintenance

Avoid unexpected costs and downtime.

Our Solutions

Onyx

Fleet management for your mixed fleet

Plug and play. It's that simple.

Onyx is tailor-made for a mixed fleet, accommodating all makes and models of machines and integrating different types of trackers, whether they're from GemOne or from other suppliers. Our Onyx platform shows you the status of your vehicles instantly: where a machine is located, who is operating it, and when it is due for maintenance.

Sapphire

Premium product for material handling

Sapphire is a complete ecosystem that makes your warehouses safer and more efficient. It's the next generation of telematics for material handlers. Sapphire utilises safety checklists, licence management tools, access control, and automatic collision lock-out to ensure your employees, your machines, and your business are safer and more future-proofed. And it enables you to do all of this from anywhere, at any time.
