

Pedestrian Proximity Detection AI Camera

Increase work area safety with pedestrian proximity detection & warnings

Make your workplace safer:

Detect and alert operators with an audible and visual warning when pedestrians are within proximity of your machines.

Get rid of dangerous blind spots in operator visibility:

Increase productivity, shorten training time for new drivers, and reduce operator fatigue and stress.

Streamline incident investigation:

Our cameras continuously record when the forklift is switched on.

Plug and play. It's that simple.

Physical specifications

Resolution:	1080p
Ingress protection:	IP69K
[Degree angle]:	130°
Operating temp:	-4°F to +140°F
Storage temp:	-40°F to +176°F

Features

Plug and play install:

No additional wiring required.
Magnetic mounted custom bracket
(no welding or drilling).

Single detection zone:

25 feet range for ease of use.

Robust operator warnings:

Visual and audible (max 90 db) notification
when pedestrians are detected.

Starlight night vision mode:

Records in dimly-lit environments.

Local footage playback:

View video directly on the display screen.

No need for dedicated DVR:

11 days of high res video* (comes with SD card).

One single screen:

Integrated into our Sapphire fleet
and safety management solution so you
see everything on one screen, decluttering
your operator dashboard.

Add additional cameras:

Accommodate up to 4 cameras
(fork, mast, and rear view), all viewable
on the same display.

* Varies depending
on number of
cameras and number
of shifts operated.

Powered by Sapphire for simple installation and use
