Introducing Our ==new== AI Camera

Why opt for the latest model?

Make your workplace safer:
Detect and alert operators with an audible and visual warning when pedestrians are within proximity of your machines.

Get rid of dangerous blind spots in operator visibility:
Increase productivity, shorten training time for new drivers, and reduce operator fatigue and stress.

Streamline incident investigation:
Our cameras continuously record when the forklift is switched on.

How does the New AI Camera compare with our previous model?

AI Camera	1ˢᵗ gen	2ⁿᵈ gen
Plug and play install, no additional wiring required	✅	✅
Magnetic mounted custom bracket (no welding or drilling)	✅	✅
Visual and audible (max 90 db) notification when pedestrians are detected	✅	✅
Starlight night vision mode records in dimly-lit environments	✅	✅
Local footage playback: View video directly on the display screen	✅	✅
No need for dedicated DVR: 11 days of high res video (comes with SD card)	✅	✅
One single screen: Integrated into our Sapphire fleet and safety management solution	✅	✅
Accommodate up to 4 cameras all viewable on the same display	✅	✅
Default detection zone works out of the box	✅	✅
25 feet range for ease of use	✅	✅
Adjustable detection range	❌	✅
Cycle through pre-determined zones	❌	✅
Customisable detection zone to personal preference	❌	✅
Backwards compatible with all Sapphire V2SC displays	❌	✅
Upgraded algorithmic feedback (V2) based on previous years of data capture on V1	❌	✅

Make adjustments via a remote & receiver	❌	✅
1 single remote & receiver for multiple cameras	❌	✅

Level up your hardware:
Ask GemOne about replacing your current (AI) cameras
with our newest models.

Skip the rewiring:
These units are designed to be "Plug & Play"
with your existing Sapphire display, SD card, and harness.
