

GemOne®

A company of **TVH**

Experience GemOne Telematics with a Zero-Cost, Zero-Risk Pilot Program

Unlock total visibility into your material handling fleet with our **zero-cost pilot program**. Deploy the latest Material Handling telematics technology, including **AI Pedestrian Detection cameras** for real-time proximity alerts and rigorous **OSHA compliance**.

This program allows you to solve your toughest operational challenges with zero financial commitment while receiving full professional support and actionable data for every vehicle and operator.

Why Run a Pilot?

We don't just want to sell you hardware; we want to provide solutions to solve your specific operational headaches. This pilot is a 'try before you buy' partnership designed to ensure our solution meets your needs.

Zero Cost. Zero Risk:

We bring the industry expertise and technology. You provide the equipment. If our solution does not deliver the results you need, we walk away – no strings attached.

Dedicated Project Management & Technical Support:

Our team handles all implementation aspects of the pilot so you can stay focused on your business.

Custom Success Mapping:

We identify your top use-cases (e.g., impact tracking, unauthorized use, operator training, OSHA safety mandates, pedestrian detection) and tailor the pilot to solve them.

Why GemOne - Leading industry expert

In the fast-paced world of material handling, you need data and visibility to fuel safety, uptime and fleet optimization.

We are so confident of our solution and approach that we invite you to try our full-access pilot at no cost.

Your facility.

Your equipment.

Your results.

What's Included?

Professional Installation: A GemOne certified technician will handle the installation of your pilot.

Hands-on Training: We train your managers and operators to ensure immediate adoption.

Active Monitoring: Dedicated support to help you interpret data and find 'quick wins.'

Consultative Review: A comprehensive summary evaluating how the pilot addressed your core objectives and identified use cases.

Focusing on safety

By participating in a GemOne pilot, you can immediately begin improving safety in operations with a solution designed to protect your most valuable assets: *your people*.

GemOne helps you move away from manual, paper-based OSHA processes and future-proofs your business by establishing a high-standard, digital safety culture while leveraging the latest AI safety technology.

During the pilot, you will experience how GemOne transforms safety through these core capabilities:

**Total Control
Over Machine
Access**

**Create
Operational
Accountability**

**OSHA
Digital
Compliance**

**Proactive
Awareness
& Incident
Response**

**Data-Driven
Safety
Culture**

Ready
to see the
difference?

**Let's put GemOne to work in your fleet today,
on our dime.**
